

## NTECL NTPC Tamilnadu Energy Company Ltd

( A Joint Venture of NTPC Ltd & TNEB) Vallur Thermal Power Project

Ref: NTECL/EMG/F7/ES-FormV:2023-24 Date: 09.05.2024

To Joint Chief Environmental Engineer Tamil Nadu Pollution Control Board 951/1, Poonamalle High Road, Arunbakkam, Chennai -106

Subject: Submission of Environmental statement in Form 5 (2023-24) from NTECL Vallur

Sir.

Please find the enclosed Environmental Statement report in form-5 by NTPC Tamilnadu Energy Company Limited for the year 2023-24

Thanking you

Yadala Apparao AGM(EMG)

#### **Enclosures:**

> Form V 2023-24

## Copy to:

- Additional Principal Chief Conservator of Forests, MOEF and Climate Change, 34, Cathedral road, Nungambakkam, Chennai – 34 (ro.moefccc@gov.in)
- DEE Gummidipoondi, TNPCB, SIPCOT, Gummidipoondi 601201

## **ENVIRONMENTAL STATEMENT IN FORM - V**

## **Environmental Statement for the year ending March 2024**

	PART A						
	General information						
1	Name and Add	lress of the unit	NTPC Tamila	NTPC Tamilnadu Energy Company Limited,			
	Address		Post, Ponneri	Vallur Thermal Power Project, Vellivoyal Chavadi Post, Ponneri Taluk Thiruvallur Dist., Chennai – 600 103.			
	Name of the O	ccupier	A K Manohai	A K Manohar Chief Executive Officer			
2	code), Seconda		TC Red/ Large	Red/ Large			
3	Production cap		3 × 500 MW				
4	Year of establi	shment	Unit 1: 28.03 Unit 2: 28.02	Dates of commissioning: Unit 1: 28.03.2012, Unit 2: 28.02.2013, Unit 3: 28.02.2014			
5	Date of last env		30.06.2023				
	PART B						
(4)	T :		Raw material Co				
(i)		ption (m3/day) 2	2023 -24 (Sea wate				
	Process Cooling			56,748 m <sup>3</sup> /day 1,20,591 m <sup>3</sup> /day			
	Domestic			3,8,834 m³/day			
	Total water co	nsumntion		2,16,174 m³/day			
(ii)		nsumption per unit of the product					
()	Name of the	Water consumption per unit of product output					
	Products			L/KWh			
			22-23)	(2023-24)			
	Electricity	9.51 L/KWh (Sea water)		11.91 L/Kwh (Sea water)			
(iii)	Raw Material		•				
	Name of the	Name of the	Raw material o	consumption per unit of the product			
	raw material	product	(2022-22)	(Kg per Kwh)			
	Coal	Electricity	(2022-23) 0.745 Kg/Kwh	(2023-24) 0.728 kg/Kwh			
	Cuai	Electricity	U. /+J Kg/KWII	U. / ZO Kg/ KWII			

PART C									
	Pollution discharged to environment/unit of output								
	(Parameters as specified in the consent issued)								
(i) Water Pollution (2023-24)									
Trade effluent (C	Central Monitori			<b>):</b>					
Pollutants	Prescribed Po		Quantity of Pollutants discharged		Average annual value		Percentage of variation from prescribed standards

					and Unit 3 in August 2022.				

#### **PART D**

#### **Hazardous Wastes**

(As specified under Hazardous and other Wastes (Management and Transboundary Movement) Rules, 2016

Hazardous Wastes		Total Quantity (k	Kg)
	2022-23	2023-24	Remarks
a) From Process			
5.1 - Used Oil	24 MT	50 MT	Ovantity airon to
5.2 - Waste Oil	50 MT	50 MT	<ul><li>Quantity given to</li><li>recyclers in the year</li></ul>
33.1 - Empty	19.4 MT	45 MT	2023-24
Containers			2023-24
b) From pollution			
control facilities			

PART E					
Solid Wastes					
Solid Wastes	Total Quantity (Kg)				
	2023-24				
a) From process	Ash is generated from coal combustion. Ash utilization details are				
	given in this report.				
b) From pollution					
control facilities					
(1) Quality recycled or	-				
reutilized within the					
unit					
(2) Sold	-				
(3) Disposal	-				

#### PART F

Characteristic (in terms of consumption of quantum) of hazardous as well as solid wastes and disposal practice adopted for both these categories of wastes.

## **Hazardous Waste**

Used/Spent oil, Waste Oil and empty containers of Paint and Oil are being stored in sealed drums under covered shed at NTECL and disposed to authorized recyclers through M/s MSTC auction. NTECL has awarded a contract to TSDF RE Sustainability Gummidipoondi for disposal of Hazardous Waste.

## **Solid Waste**

Colour coded dustbins are distributed to every house in NTECL township. Solid waste is being segregated at source. Organic waste is being composted. Accumulated Plastic Waste is given to recyclers/pyrolysis agencies.

Accumulated Municipal solid waste was handed over to M/s ADS clearing systems who is authorized service provider of Greater Chennai Corporation.

Wastes handed over to recyclers in the year 2023-24:

- > 162 MT of Ferrous waste
- > 29 MT of non-ferrous waste
- > 0.95 MT of E-Waste

## PART G

## Impact of the pollution abatement measures taken on conversation of natural resources and on the cost of production

## Complete Sea water based plant

NTECL is a unique thermal power plant that entirely uses Sea water ( $12,150~\text{m}^3/\text{hr}$  at full load) for all its purposes thereby preserving scarce fresh water resource available on earth. A 20 MLD desalination plant is operational since inception for processing Sea Water.

NTECL operates on closed cycle cooling water system. Further, Ash water recirculation system is in service where ash pond effluent is circulated back to the station for ash mixing and disposal into ash pond. Sewage Treatment Plants are operational and treated water is entirely used for horticulture.

Additionally, a solar drinking water project of 125TPD that uses Sea Water and Solar Energy to produce Potable Water is erected at NTECL. BIS certificate for drinking water produced from NTECL Solar desalination Plant was obtained on 03.08.2022 and drinking water requirement is met through this system.

Fig 1: Solar Desalination Plant installed at NTECL

#### **PART H**

# Additional measures/investment proposal for environmental protection including abatement of pollution or prevention of pollution

## Electro Static Precipitator

Each Unit is connected to highly efficient Electro static Precipitator (99.969 % efficiency) that maintains the Particulate Matter emissions from stack within 50 mg/Nm<sup>3</sup>. Stacks for height 275 m are provided for wide dispersion of emissions into the atmosphere.

Fig 2: Electro Static Precipitator at NTECL

## FGD construction and NOx control measures

NTECL has to achieve SO<sub>2</sub> limit of 200 mg/Nm<sup>3</sup> before Dec 2024. NTECL awarded contract for FGD (Flue Gas Desulphurization) installation to M/s Tata Projects Ltd in April 2020 and the works are in progress.

Fig 3: FGD construction at NTECL

In order to meet  $NO_x$  emission limit of 450 mg/Nm³, NTECL has completed Combustion Modification in Unit 1 in Dec 2020, Unit 2 in Sept 2021, Unit 3 in Aug 2022. NOx standards are achieved at NTECL well within the timeline stipulated by MoEF&CC.

Fig 4: NOx reduction - combustion modification works in boiler

## Ash Utilization

There are 3 Ash Silos of capacity 1700 MT each for collecting Ash in Dry form. Bottom Ash is sent to Ash Dyke. NTECL has tied up with Cement, Bricks, Ash utilization at NTECL is shown in the table below.

Sl.	Financial	Ash generated	Ash utilized	Ash utilization
No	year	(Million Tonne)	(Million Tonne)	(%)
1	2023-24	1.830	2.519	137.79 %
2	2022-23	2.947	2.050	69.58%
3	2021-22	2.447	1.910	78.09 %
4	2020-21	1.277	1.568	122.80%
5	2019-20	1.744	2.11	121.02%

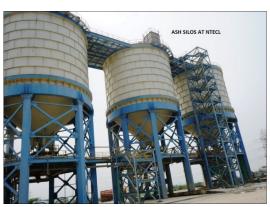

Fig 5: 3 No of Dry ash silos at NTECL

## Ash utilization achievements in 2023-24

- Financial year 2023-24 has recorded highest ever total ash utilization of 25.20 lakh metric tons (137.79 %) at NTECL Vallur.
- > Financial year 2023-24 has recorded highest ever pond Ash utilization of 17.74 lakh MT at NTEC Vallur

## Environmental monitoring

- ➤ Effluent, stack, and Ambient Air Quality parameters are being transmitted continuously to TNPCB since 2015 and to CPCB since 2017.
- > TNPCB annual environmental survey was conducted on 15.03.2023 and then on 26.04.2024 and parameters are within permissible levels.
- > Fortnightly monitoring by MoEF&CC recognized NABL accredited laboratory is being carried out regularly.

## **PART I**

## Any other particulars for improving the quality of the environment

## Wind Barriers for Coal Stock yard

Wind barriers of 12 m height that are taller than coal stocks are erected in coal stock yard to catch coal dust. Wash water from coal handling area is collected at Coal Slurry Settling Pit, treated and sent for final disposal.

Fig 6: Wind barrier for coal stock yard at NTECL

## Dust suppression, Dust extraction at Coal Handling Plant

Dust suppression system is installed at all transfer points of coal handling system to contain the fugitive dust due to coal movement.

Installation Dust Extraction System at coal handling area was completed and it was made operational in 2022-23.

Fig 7: Dust extraction sytem at Coal crusher house

## Green belt development

Till March'24 NTECL has planted 36,359 trees inside and 24,000 trees outside its premises through Tamilnadu Forest Department.

NTECL has done Mangrove plantation through MS Swaminathan Research Foundation in 14.97 ha of its own land by adopting Fish bone canal method.

## Mission LIFE campaign and World Environment Day celebration

Activities under Mission LIFE campaign of MoEF&CC had a great impact on people of NTECL. World Environment Day (5<sup>th</sup> June 2024) was celebrated at NTECL with various competitions and awareness programmes.

A Mass tree plantation was headed by Shri Asesh Kumar Chattopadhyay, CEO NTECL, GMs and HODs. First ever household E-waste collection drive, Elocution competition to children, Essay competition to Housewives on 'Eco Friendly practices in Indian Tradition,' Green Walk with township residents, fertilizer spray training were conducted.

**Jute bags** with LIFE Logo and message 'Let us prevent Plastic Pollution' were distributed to all employees to support 2023 World Environment Day theme.

## Vehicle Emsission Check up camp

A free pollution under Control – vehicle emission check up camp was organized in association with IOCL on 08.01.2024 at NTECL Vallur.

Fig 10: Pollution check up camp held at NTECL Vallur

## World Water Day 2024

NTECL conducted mass awareness programme on Water conservation to the students of S R Palyam Government Highschool on 22.03.2024. Well-practiced Skit, Songs and Mime were presented by students. Elocution competition to NTECL township children, Essay competition to Employees and spouses were conducted on this years theme 'Water for Peace.'

Fig 11:World water Day March 2024

## Environmental Awards to NTECL in 2023-24

- > 'PLATINUM' award in the prestigious "Green Maple Foundation Spotlight Awards" under the category 'Environment Management.'
- Shri Omkar Nath popularly known as Medicine Baba presented the award during conferment ceremony at 26.11.2023 at 'The Ashok' Chanakyapuri, New Delhi

Fig12: NTECL receiving Platinum award in Environemnt Management at GMF spotlight awards 2023.
